The Problem

Our Problem Statement and Beneficiary Discovery

Original Problem Statement

Security engineering officers in U.S. Embassy Baghdad need a better way to detect and locate non-US autonomous drones within 1/2 kilometer of the US Embassy Baghdad in order to prevent adversaries from surveilling and harming the people inside the embassy.

Problem Statement Pivot

Security engineering officers in U.S. Embassy Baghdad need a better way to detect and locate non-US autonomous **group 1-3 UAS** with **different types of signals** within 1/2 kilometer of **high risk US Embassies** in order to prevent adversaries from surveilling and harming the people inside the embassy.
